

INTRODUCTION TO FREESTYLE PROGRAM

At last !!!

Dogs Can Dance, our popular fitness program designed specifically for our canine pals, now has a special "home" edition available for those who are unable to attend a regular class series. This home program includes the Dogs Can Dance written manual, music cd, and training dvd.

The materials define the theory behind, and the desired goals of program participation. They provide written descriptions, along with audio, and video examples of the basic moves as well as a sampling of routines from some of our more advanced classes.

Old dogs, young dogs, big or small, Dogs Can Dance will work for all!

Old: Older dogs rise to the challenge of proving that yes, it is still possible to teach their owners new tricks! The program is quite flexible, allowing those whose owner's aren't quite up to speed, to proceed at a pace that is comfortable for them. The positive mental and physical stimulation provided by the program are important keys to prolonging a healthy life for your older dog as well as for yourself.

Young: For young or adolescent dogs, the program provides a focus for their boundless energy and enthusiasm, challenging them to develop new skills, rewarding them with increased confidence in their abilities.

Big or Small: Too hot, cold, rainy, or windy outside? Many of the program's basic routines can be performed (even by a Great Dane) in an area as small as 8ft by 8ft.
